

Join the Partner Program

Are you an innovative grower or grower federation? In this final stage of the development we think it's essential to involve you to determine our final requirements in terms of varieties, growing systems, ... and eventually meet the expectations of the market.

The benefits of the partnership are mutual. On the one hand, by co-funding we are sure your buy-in is genuine. And it allows us to keep our independence from investors and other market actors. On the other hand, members of the pilot program will get a royalty on all produced robots or discount on purchased robots until the funding is paid back with interest. On top of that, all partners will have the right of first refusal on 80% of production in the first three years of commercialization proportional to their participation in funding.

Partnership packages

	Bronze	Silver	Gold
Entrance to the Partner meetings, where we will give an update on the status of the development	Bronze meetings (at least 2/year)	Silver meetings (at least 2/year)	Gold meetings (2/year)
Influence the roadmap by giving input for the requirements related to growing system, varieties, packaging,...	🌀	🌀	🌀
Requirement gathering on site, including image acquisition of your crop		🌀	🌀
Gap analysis between your infrastructure and our robot		🌀	🌀
